ANOTHER OF 110TH CITED FOR BRAVERY IN MARNE BATTLE

Sergeant Robert A. Floto, Meyersdale, Is Awarded Medal.

KILLED MANY GERMANS

And Captured Others, Say Advisers Received at His Home Town; Member of Company C and Nephew of E. R. Floto, Connellsville Bank Official.

Among the members of the 110th Regiment who distinguished themselves in the recent fighting on the Marne front was Sergeant Robert A. Floto of Meyersdale, member of Company C and nephew of E. R. Floto, treasurer of the Young Trust company, Connellsville. He has been cited for gallantry and awarded a medal for killing and capturing a number of Germans according to word received at Meyersdale.

Sergeant Floto is a son of Daniel A. Floto, Meyersdale cigar manufacturer. He first entered into the military service of the United States during troubles on Mexican border, where he served for a time as corporal in a Regular Army infantry regiment. Later he taught school at Fort Bayard, Texas, which was attended by children of officers at front.

During formation of Company C, the "Fighting Tenth" Pennsylvania Regiment National Guard, Floto enlisted and went with the Company to Camp Hancock, Augusta, Ga., where he was promoted to rank of first sergeant, leaving there with the 110th. Floto's grandfather, the late August D. Floto, was sergeant in Tenth Pennsylvania's Reserves during the Civil War and was seriously wounded at battle of Fredericksburg.

Sergeant Floto is exceptionally bright, and has been frequently commended by his superior officers for close application to his duties as a soldier.

The cables are daily carrying the names of officers and men of the 110th Regiment who are being cited for gallantry in action. Among those so honored yesterday are Capt. Charles L. McClain of Company P of Indiana, and Private David Marchand of Monongahela, formerly of California, and a member of Company A.

"BOOTS" McDermott, mascot of 10th Regiment, known to all 10th Regiment members as "Boots," the "Boy Hero of Manila Bay" and mascot of the regiment during the Spanish-American war, has been seriously wounded on the western front where he has been serving with the field artillery.

When the 10th Regiment passed through Pittsburgh in 1898 on its way to the Philippines "Boots," then a nine-year old newsboy, got aboard the train and remained with the regiment on its journey to Manila. "Boots" saw plenty of active service in the Philippine Islands. He carried ammunition to the soldiers, and did everything but fire a gun. When Colonel A. L. Hawkins, commander of the regiment, ordered "Boots" home Admiral Dewey took him aboard his flagship and took him to Hong Kong with him. He was given a sailor's kit by the admiral, who insisted that "Boots" come back to the United States and attend school.

LONDON, Aug. 3.—The Germans are executing a local retirement to the east bank of the Aisne, in the region of Albert, on a front of three or four miles, according to news received in London today. The German hold on the west bank of the Aisne in this region has been precarious and it seemed to be tenable only if it were intended to be made use of in the starting of an offensive. The retirement appears to indicate that the abandonment of any attempt at an offensive in that quarter at present.

SUDDEN DRIVE BY FOCH MAY CHANGE THE ENTIRE ASPECT OF HUN CAMPAIGN

Every Evidence in City of Soissons That Retreat Was Precipitate and Coming of Allies a Surprise; Many Prisoners Taken; Boches Closely Pursued.

RETREAT GENERAL ALONG WHOLE SALIENT, SAYS CORRESPONDENT

By Associated Press. PARIS, Aug. 3.—Throughout last night the Allies continued to advance towards the Vesle, the French war office announced today. East of Soissons the French have reached the Aisne between Soissons and Venizel. The statement reads: "During the night the French troops continued their advance towards the Vesle. On the left the French reached the Aisne between Soissons and Venizel."

The evacuation of the line of Vesle, if it had not been brought about before, seemingly is made compulsory by the French advance to the Aisne east of Soissons. Coupled with the French advance north of the Aisne yesterday to Pommieres, northeast of Soissons, it is a dangerous menace to the Aisne.

SOISSONS BLOW SURPRISE.

PARIS, Aug. 3.—(Havas Agency)—Many prisoners were taken by the French at Soissons, which was occupied at 5 o'clock Friday evening, one hour after the Germans had been driven from the suburbs. Those of the garrison not captured escaped by fleeing northward.

It seems the enemy did not expect to be chased from Soissons. There were no indications that preparations had been made for retirement and no fires were discovered anywhere.

On the left on Friday French cavalry and tanks kept in close pursuit of the enemy and inflicted heavy losses.

ENEMY RETREAT GENERAL.

LONDON, Aug. 3.—The German retreat is general on all three faces of the salient conquered by the Germans in May and the Allies are pressing close on the heels of the retreating enemy, says Reuter's correspondent at French headquarters, telegraphing at 11 o'clock Friday night.

After the fall of Soissons, the correspondent adds, French headquarters received the names of villages and woods reconquered by the Allies with almost monotonous regularity. "Plessier woods," he continues, "which abuts on the Soissons-Chateau Thierry road, was turned early in the day and the defenders surrounded. This wood was the center of the enemy resistance and the fight for it was extraordinarily bitter."

"As in March of last year the French army is advancing in pursuit of the enemy with cavalry patrols far in advance, while the horse artillery and engineers accompany the infantry. The description given by the correspondents of the Berlin Tagblatt of the devastation of towns, villages and farms by the enemy is true and the destruction the German boasts of is all the German gains by three great offensives which costs them hundreds of thousands of killed, wounded and prisoners."

HUNS LOSE ALONG SOMME.

LONDON, Aug. 3.—British patrols last night pushed their way forward in the Albert sector, north of the Somme, and occupied parts of the German front line, the war office announced today.

AUGUST CHECKS LATE?

If They Are Dependents of Men in Service Need Not Worry.

Owing to changes in the manner of handling the system of allotment of funds for relatives of soldiers and sailors August checks will be somewhat late in arriving. Through the home service sections of the Red Cross the government is attempting to make plain that this fact need cause no concern. The funds will arrive in due time.

Under the new plan the payment of allotments and allowances is simplified. The Bureau of War Risk Insurance will now handle compulsory allotments only. The other work is transferred to the War and Navy Departments. There have been changes in the law which will in time work out for the benefit of all, but which will temporarily cause delays.

All the men in the service have been notified of the changes in the law and in the course of time everything will be adjusted. If every family, however, were to write to Washington governmental machinery would be crippled in handling the correspondence.

SUGAR SUBSTITUTES

Suggested as Means of Avoiding a Shortage of Sugar.

State Food Administrator Heinz, with a view to a further conservation of the sugar supply which is endangered by a threatened shortage, has issued a warning to housewives against all extravagance in consumption.

He asks that but one lump be used in a cup of coffee or tea and that it be thoroughly stirred with a spoon. A whole spoonful of granulated sugar should not be shaken over fruit or cereal just because too much was taken from the bowl; put back all not actually needed. When using condensed milk a lessened amount of sugar can be used, the milk alone furnishing almost enough sugar.

Make griddle cake syrup from fruit juice. Instead of sugar, adding chopped dates, raisins and currants. Do not put the sugar bowl on the table every meal. Acquire the habit of using less. Use sweet dried fruits, such as dates, raisins and figs to sweeten desserts and cereals and in place of candy. Use honey, syrups, maple sugar and molasses to sweeten desserts and beverages and in making cakes and cookies and, as far as possible, in canning and preserving. Can fruits by making fruit pastes.

LIEUT. DILWORTH "FINE AND DANDY" BUT WANTS A "TOBY"

A letter received today by Mrs. D. K. Dilworth, from her son Lieut. J. M. Dilworth of Company D, 110th Regiment, gives an interesting account of a forward movement of the regiment from its original station in France. Lieutenant Dilworth, who is serving as supply officer of the first battalion, had charge of the transportation of supplies. These were moved partly by the "scenic" railway cars of the narrow gauge roads, and partly by truck. The section of country through which the movement was made is quite different from that left behind by the regiment. The people are of a more prosperous class and many are well to do.

The battalion staff frequently had quarters in elegant chateaux with downy beds and all the comforts of home. Several nights the train bumped in a forest. When beginning the march all baggage except the individual blanket rolls of the men was left behind.

At the time of writing his letter, which was dated June 15, Lieutenant Dilworth was quartered with the majority of a town, the father of five daughters but much less charming, Lieutenant Dilworth says, than the girls of the "good old U. S. A."

Much complaint exists among the boys over non-arrival of mail. Letters come very infrequently and papers seem never to get through. Lieutenant Dilworth says that he "is still fine and dandy," the only thing lacking to make his comfort complete being a good Connelville "toby" in his mouth and a big fat letter from home in his hand.

What Eye Comfort Means.

Often eye comfort means much more than freedom from eye strain. Because freedom from eye strain means freedom from many other physical ailments. This is explained by close connection between the eyes and the general nervous system. People who are nervous without any apparent cause would do well to have their eyes examined for possible defects. No better service than ours.

istry at Munitions handles 80,000,000 articles per week and sends abroad 30,000 consignments per week. In addition to over ninety national arsenals, Great Britain now has 5,000 Government-owned factories, all manufacturing great quantities of munitions and supplies. We do 60 to 70 per cent. of the machine-work on shells, fuses and trench warfare supplies and have contributed 1,430 trained mechanics to the Royal Flying Corps. In one way or another about 5,000,000 British women are working for their country in her need, many of whom never worked in their lives before.

Turning to the fleet, what shall I say, what can I say that will be at all adequate to the theme, of the work done by the British Navy? It would be almost ludicrous in a review of Britain's share in the war to dismiss in a sentence the absolutely vital part borne by the fleet did I not feel assured that every intelligent man and woman in the United States knows as well as I not better than I that the civilized world owes its existence today to the unparalleled services rendered by the Navy.

And, alas, how can I deal with the aid given to the northward by Canada, Australia, India and South Africa? The requisite tribute were it to be rendered adequately would need a volume.

No review of our four years' fight can omit a brief reference to that ill-omened word Kultur. According to the Hun, the whole quarrel hinges on the refusal of the democracies of the world to accept Kultur. Very well. What is Kultur? I have here a table of the worst forms of crime committed in Germany and England during the ten years 1870-1907:

Germany. England.	
Murder	350 97
Incest	573 53
Rapes	8,331 216
Unnatural Crimes. 841	230
Malicious and Felonious Wounding	172,138 1,262
Malicious damage to property	25,770 858
Arson	619 278
Total	206,667 2,387

People of America, you fathers and mothers, wives, sisters and sweethearts of the men you have sent to France, I ask you to study that table. Kultur should be known by its results, and if hitherto England can show such a case against enlightened Germany it is not worth four years, or, if need be, forty years of war to keep your country and ours clear of the virus of Kultur? The answer is being given today wherever the Hun stands up against our soldiers. It is being dimmed into his ears by high explosives and driven into his carcass by French bayonets. When he hears we will quit, and not until he does heed—his knees.

a lot of household furniture and two
pigs which she claimed belonged to
her to the residence of Moore on
Church street where she is now mak-

busy getting her alleged belongings
removed to her new home that she
forgot to attend the hearing pending
against Mrs. Jones when the justice
dismissed the case. There is no time
set for the larceny case against the
Smith woman which will be heard
before Justice J. C. High.

The Difference.

drama and a melodrama?"
"In a drama the heroine merely
throws the villain over. In a melo-
drama she throws him over a cliff."

The Lesson The Singer Learned And Sang

A catchy song is always relished at the close of a perfect day. The young darkey has been aroused in spirit to the value of buying at home as against the dangers of dabbling with the mail order and catalogue houses. He has seen wherein those who have bought elsewhere have suffered loss, while those who have traded at home have benefited themselves and their community. Those who hear his "out of the heart" song, also realize and appreciate the value of his comely words as carrying a real lesson and like the singer have resolved to deal with the home merchant.

MORAL:—Every song has a meaning, but the song of the home is always the most cheerful.

INDIANS LOSE TWO

The Indians team, already crippled by the jumping of several players who have gone into some war work, lost two more when First Baseman Clarence Covington and Pitcher Jean Dale were called for immediate army service. To replace Dale the club has secured a young pitcher named Stewart from the St. Louis Browns.

HURLER TESREAU HAS JUMPED GIANT TEAM

"Jeff" Tesreau, who came to the New York National league baseball club as a pitcher from the Texas league in 1910, left the club the other day to join the Bethlehem club of the Steel league.

John B. Foster, secretary of the New York club, said that Tesreau recently told Manager McGraw he was "disgusted with baseball and wanted to get into some other business." Tesreau, according to Foster, is in class 4 of the draft, so that his change was not actuated by desire to escape military service.

OVERTIME TILTS THIS YEAR

Daylight Saving Law Mainly Responsible for Two 19-Inning Games Played So Far.

Perhaps before the present season ends all records in the major league for lengthy games will be broken. Already there have been two 19-inning games.

The law which saves an hour of daylight is mainly responsible, for it permits a game to go along until decided. The Phils and Cardinals started their 19-inning game at 3:30 o'clock and played until eight o'clock.

This would have been totally impossible in previous years. Chief Umpire Quigley called the game on account of darkness at the end of the nineteenth inning. It is rather questionable whether he was justified in calling the game off. The teams could have battled one or two innings longer and a decision might have been reached, making it unnecessary to re-play the game. As it is the four hours and thirty minutes of desperate play went for naught.

STEVE BRODIE IS IN FRANCE

Veteran Ball Player Is Coaching Soldiers in Pershing's Army in Fine Points of Game.

Walter (Steve) Brodie, veteran ball player, has been heard from in France, where, under the auspices of the Y. M. C. A., he is coaching the soldiers of Pershing's army in the fine points of baseball. Brodie was a member of the famous old Orioles of the nineties.

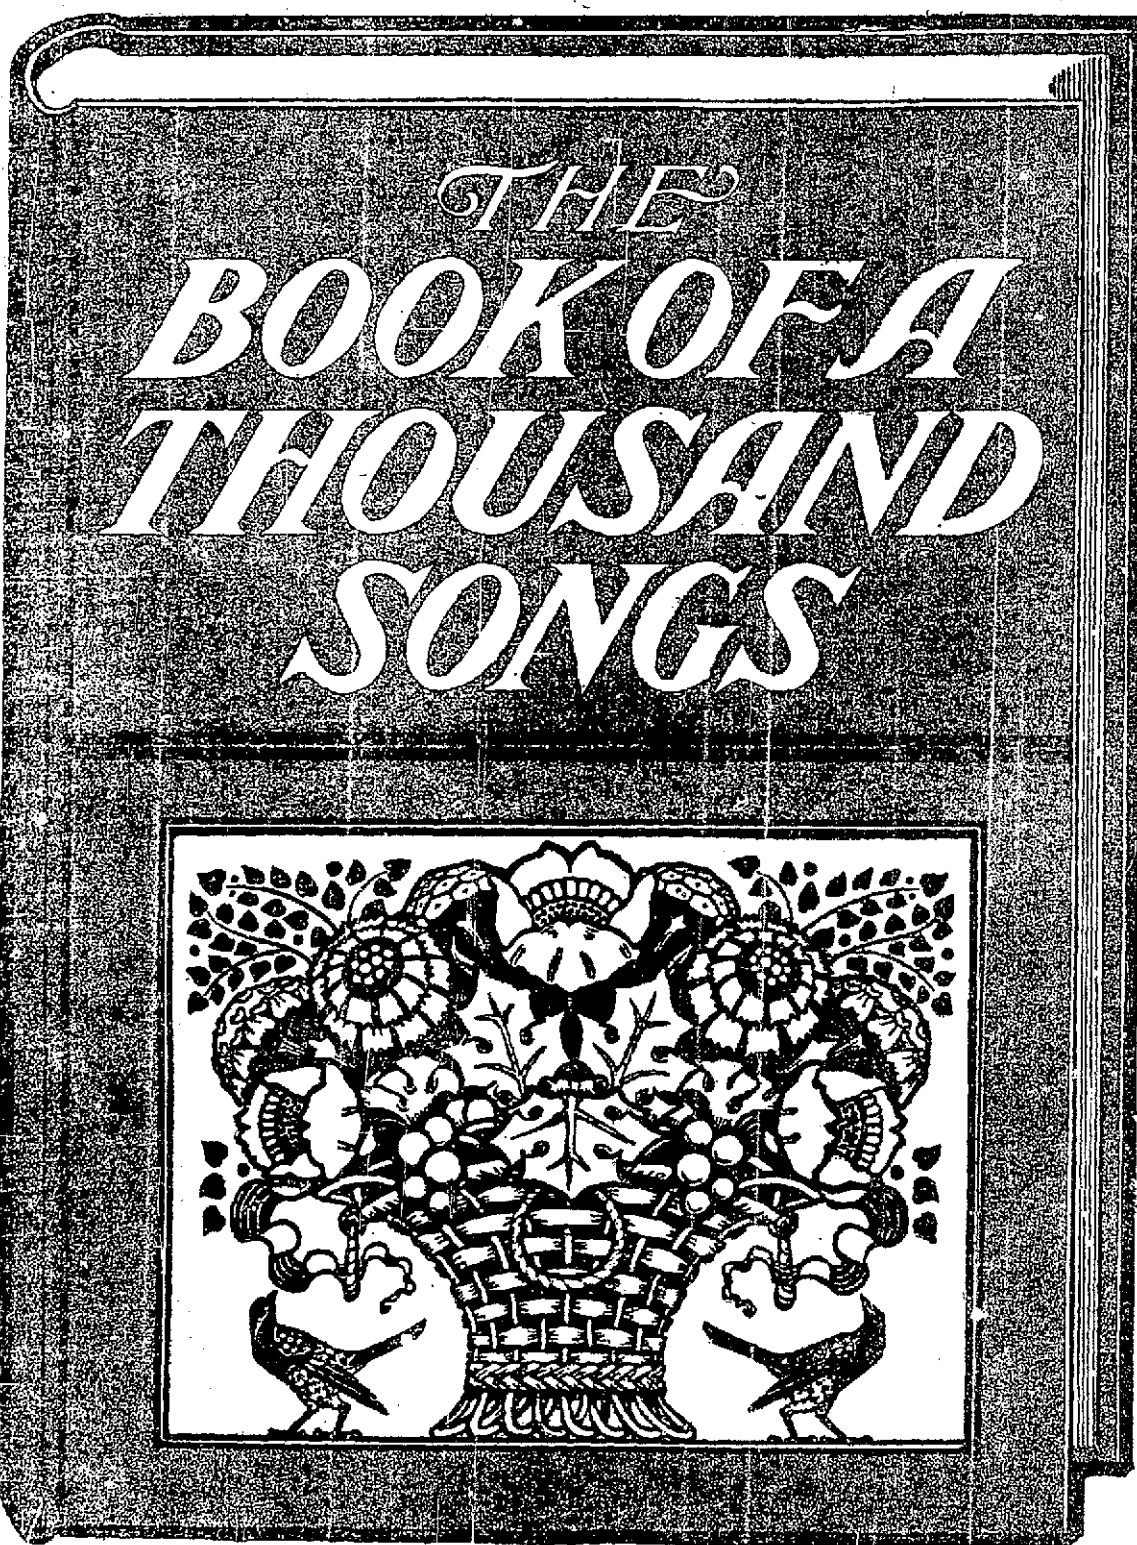

Sam and "Bully Bee" for British.

The amount of jam that the British soldier is eating on this campaign has attracted the notice of all the foreign newspaper correspondents, American, Belgian and French, who have seen for the first time the British soldier in war. The supply of this particular delicacy seems to have been unlimited. With jam, "bully beef," biscuits and tea, the British soldier seems able to go anywhere and do anything. No doubt jam is excellent food and, to a certain extent, I fancy that it replaces fresh vegetables. The first campaign in which jam played a noticeable part was the second Boer war.

In Peninsular and Crimean days freshly killed beef and biscuits were usual rations of the troops; but the traveling field kitchens on wheels which now accompany all regiments and batteries have improved the British soldier's lot.—Exchange.

\$500,000 SAVED

By Substituting Coke and Soft Coal for Anthracite Coal.

Substitution of bituminous coal and coke for anthracite coal has made a saving of approximately \$500,000 for the War Department and a saving in transportation of approximately \$3,000,000 ton miles, according to announcement made by the War Department as follows:

"At 31 posts, camps, cantonments and stations in the territory south of Washington and west of Pittsburg, approximately 200,000 tons of anthracite coal was called for to cover requirements for the fiscal year 1919. As a result of investigations bituminous coal and coke have been substituted for anthracite and a saving has been effected of approximately \$300,000 in cost of coal and approximately \$200,000 in cost of transportation, or a total saving of approximately \$500,000.

"In addition to the saving in cost as indicated there will be a saving in transportation amounting to approximately 33,000,000 ton miles, which will make available for other purposes this amount of railroad transportation."

RETIRED MINERS

Return to Work to Show Their Loyalty to Their Country.

"A striking evidence that the mine worker has become impressed with the vital importance of the work administration," comes from the mines of the Mercer Iron & Coal company at Sinebore, Pa.

"These mines are the oldest in that section of the country and have for years produced a large quantity of high-grade coal. Their production is in the neighborhood of 500,000 tons a year.

"There were in that section about one hundred and fifty miners who had been in the service of the company years ago, and, on account of age, had retired from active mine work. Realizing the country's need of coal at this time they came forward voluntarily and agreed once more to take up the pick and shovel, and, in spite of the infirmities of age, to do their part once more. A large number of these men had been able to get aside sufficient to maintain them in comfort during their declining years, but, feeling they were not fit for military service, chose this way of emphasizing their loyalty to the country.

"These men were given employment to a new opening in the mine, an opening not yet connected by railroad, but while waiting for a siding to be completed they have already mined over 4,000 tons of coal which is piled up waiting to be hauled away."

MOUNT PLEASANT, Aug. 3.—An appeal has been made to Burgess S. P. Stevens to take the matter up with the West Penn Railways Company regarding the furnishing of an extra car in the morning to take the people north to work. Despite the fact that a call is being made by the government for people to work, every day six, eight to ten persons are forced to return to their homes. The saying that there is always room for one more is lost, for not any one more can get into the car or hang on the steps. This crowded condition has existed for some time and since over a hundred persons from this town alone work at Kelly & Jones the men have made the appeal that this matter be taken up at the earliest possible convenience of the burgess as they fear some person will suffer with broken limbs or worse if a trailer is not put on by the company.

Burgess Asks for Escort.
Burgess Sam P. Stevens has asked that since all men are asked to work every minute of their time and that more boys who are going to fight are to leave Tuesday morning at an hour when all laboring men are working that members of the Ministerial association, business men who can leave their affairs for a few minutes, along with the members of the drum corps meet at the Armory and escort the draftees to the depot. The train will leave at 8.30 o'clock.

JOSEPHUS AND JOSEPH DANIELS

Josephus Daniels, secretary of the navy, and Joseph Daniels, his aid. The similarity in names is a coincidence which is not responsible for the aid's present assignment, for he has been overseas throughout the war with Admiral Sims, and his viewpoint is much desired. Daniels, the aid, is one of the most conspicuous examples of the success of Secretary Daniels' plan of promotions from the ranks in the navy. Having entered in the enlisted personnel at the age of seventeen as a third-class apprentice boy, he has been promoted steadily through all the grades to commander.
